

What The Industry Is Saying....

"This is a system that's going to revolutionize the stone industry... it's awesome! I recommend you see it in action. I think you'll be impressed."

~ Fred Hueston, world renowned stone forensics expert

"The Cheetah Pucks and Cheetah Pads are the new generation of things that are going to be coming in the future... I am here to say that I am impressed with the results we have gotten on marble, granite and terrazzo with these particular products — both the Cheetah Pads and the Pucks."

~ John Freitag, Director of The Stone and Tile School

"[The Cheetah System] is the best on the market. For the restoration expert in stone, these things are revolutionary!"

~Mike Philbin, Leading UK Stone Expert
Owner of Nu-Life Stone Care

"As with all products that I have been using from Innovative Surface Solutions, they make me look, as though I have been polishing stone for years. In reality I have only about one year's experience. When I saw just how easy it is to use your process it clicked, and I said to myself this is what I have been looking for... You have a customer for life!!.. I love to work with a

company that is so out in front with their technology. Keep up the great work."

~ Tim Bingham, Green Frog Cleaning

"I choose Cheetah Pucks over some other traditional restoration products because I have found Cheetah Pucks to be very forgiving and user friendly. By the third day of the restoration I had a helper that had never ran a floor machine grinding floors like an old pro. The Cheetah pucks (which were new to me) and monkey pads performed above and beyond what you promised, as usual. My client was more than happy."

~ Ken Pistoresi, Clean Sweep

"I have used the pads on two large jobs. I first used them on a terrazzo floor in a residence in Hilton Head, then on a restoration on a hotel floor in downtown Charleston. In both cases the Cheetah pads saved me at least one third of the labor time that I had bid the job at. My technicians are so sold on the Cheetah Pads that I don't know if I can get them back to using diamond pads! I am still in the experimental stages with the pads but I am still amazed by the results I achieve using your pads."

~ Galen Roth, Roth Restoration

Innovative Surface Solution's line of Cheetah and Monkey Pads offer the industry a "Green Method" for most restoration and maintenance, and a far more environmentally friendly option for all limestone, travertine, marble, terrazzo, concrete, granite, engineered stone, and even VCT surfaces.

INNOVATIVE
SURFACE SOLUTIONS

Achieve astonishing results!

With...

- **Less Time**
- **Less Labor**
- **Less Cost**

CHEETAH PADS

and Monkey Pads

One system revolutionizing the way surface restoration is done!

**Marble • Limestone • Travertine • Terrazzo • Concrete
Engineered Stone • even VCT**

One, Two, Three, Four, Buff... and Done!

Our industry revolutionizing technology allows you to replace the traditional metal and resin bond series of 9 steps (50 grit resin – 100, 200, 400, 800, 1500, 3,000, and well beyond 8,000) with 2-5 steps! By using this system you can achieve as much as a 50% reduction in labor and time on the job, as well as reduction in the products needed to restore virtually all of the surface types you will encounter in the field.

Step 1 pad

Replaces traditional diamonds in 50, 100, 200 and 400 grit (i.e. the step one pad removes damage like a 50 grit traditional diamond but leaves the scratch pattern of a 400 grit pad).

Step 2 pad

Replaces traditional diamonds in 200, 400, and 800 grit.

Step 3 pad

Replaces traditional diamonds in 800, 1500, and 3,000 grit.

Step 4 pad

Replaces traditional diamonds in 3,000 and 8,000 grit and beyond.

11,000 grit Monkey Pad

To create the highest level of clarity, color and gloss possible, follow Step 4 with the 11,000 grit Monkey Pad, first wet and then dry buff.

CHEETAH PADS

The FASTEST stone restoration system on the planet!

All pads in our system come in a variety of sizes and configurations that can be used on virtually any type of equipment for horizontal, vertical and floor surface restoration.

CHEETAH PUCKS

Our newest and most aggressive line is our Cheetah Pucks.

Cheetah Pucks are suited to all types of restoration but are geared towards the more seasoned stone restoration professional. These are recommended for your most aggressive restoration needs such as terrazzo, concrete, granite and lippage removal jobs. They are available in 3" and 5," attach to our velcro riser, and replace the same traditional metal and resin bond diamonds as our Cheetah Pads (see above).

Natural stone polishing made so easy a monkey could do it!

Monkey Pads

Monkey Pads are intended for light restoration, finish work and maintenance.

Monkey Pads are a revolutionary method for non-toxic, chemical-free honing and polishing of marble, travertine, limestone and terrazzo. Dramatic results can be achieved with Monkey Pads, even with minimal skill level. They come in a grit series of 200, 400, 800, 1500, 3,000, 8,000 and 11,000, as well as a range of sizes to fit a variety of equipment for countertops, vertical surfaces and floor restoration. Using a combination of Cheetah Pads, Monkey Pads, and in some cases product, any finish can be achieved — from a dull, or satin hone to a highly polished mirror-like surface with exceptional color, clarity and gloss.
